Interprovincial Insulation Inc.

Interprovincial Insulation Inc. has been a leader in the insulation industry for more than 35 years and their workmanship is a true testament to this experience. This experience is combined with state of the art computer estimating, a variety of insulation products and innovative installation technologies.

Since its foundation in 1972, Interprovincial Insulation Inc. has produced quality work, on time, and on schedule. Through the years, this company has entered into several different aspects of the insulation industry and has had limitless success in every avenue they have pursued; from Spray Applications to High Temperature Blankets to Firestopping applications.

Whether your needs are residential, commercial or industrial, no project is too big or too small for Interprovincial Insulation Inc.

In addition to major industrial clients such as Invista, Ontario Power Generation and others, Interprovincial Insulation Inc. also serves major institutional clients, including: Hospitals, School Boards and Correctional Facilities.

Ongoing training (in-house and on the job) and proper supervision contribute to an impeccable safety record, which, combined with a stringent quality control program, places Interprovincial Insulation Inc. at the forefront of the industry for quality work and expertise.

mechanical insulation

- Fully trained applicators with a 4 year apprenticeship under the International Association of Heat and Frost Insulators and Asbestos Workers Local 95.
- Experienced in the insulation of all industrial processes (Tanks, Piping and Equipment).
- Extensive experience in all industrial processes; specializing in the insulation of Power and Co-Generation facilities, Chemical Plants, and Synthetic Fiber Production Plants.
- We have our own in-house prefabrication facility where a variety of products such as calcium silicate, trymer, foam glass, fiberglass and mineral fiber are used in a multitude of applications; including our own patented insulation products.
- Specializing in the fabrication of High Temperature Blankets for turbines and Removable/Reusable Equipment Covers.

sprayed insulation and fireproofing products

- Urethane Foam and Coatings for irregularly shaped tanks and vessels.
- New residential housing and commercial buildings (the building envelope).
- Retrofit and air sealing of existing structures.
- Spray Applied Fireproofing for structural steel.
- Thermal and acoustical spray for sound retention in gymnasiums, night clubs and theatres.
- Our Applicators are all factory trained and licensed, where applicable.

firestopping and smoke seals

- Application of all firestopping materials to meet existing codes.
- Proper application by trained applicators in order to meet stringent inspections by Authority Having Jurisdiction.
- In-house Designated Responsible Individual (DRI) to manage proper installation of firestop systems and help coordinate installations with other trades.
- Committed to Life Safety through Compartmentation.
- We are a member of the Firestop Contractor International Association (FCIA).
